Sequence 27, Application US/09207359B

Patent No. 6469140

GENERAL INFORMATION:

APPLICANT: Bertin, John
TITLE OF INVENTION: NOVEL MOLECULES OF THE CARD-RELATED
TITLE OF INVENTION: NOVEL MOLECULES OF THE CARD-RELATED
CURRENT FILING DATE: 1934-11201

CURRENT APPLICATION NUMBER: US/09/207,359B

CURRENT FILING DATE: 1998-12-08

PRIOR APPLICATION NUMBER: US 09/099,041

PRIOR FILING DATE: 1998-06-17

PRIOR FILING DATE: 1998-02-06

NUMBER OF SEQ ID NOS: 47

SOFTWARE: FASTSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            В
                                                                                                                                                                                                                                                                                                       RESULT 10

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

GENERAL INFORMATION:
APPLICANT: Thomas Jefferson University
APPLICANT: Alnemri, Emad S.
TITLE OF INVENTION: IPAF, AN ICE-PROTEASE AC
TITLE OF INVENTION: FACTOR
FILLE REPERENCE: 480140, 47PC
CURRENT APPLICATION NUMBER: PCT/US02/21946A
CURRENT FILING DATE: 2002-05-24
NUMBER OF SEQ ID NOS: 14
SOFTWARE: FASTSEQ for Windows Version 4.0
; SEQ ID NO 14
                                                                                                     RESULT 2
